GOA COLLEGE OF ENGINEERING
FARMAGUDI, GOA

DEPARTMENT OF ELECTRONICS & TELECOMMUNICATION ENGINEERING

2016 - 2017

HUMAN IDENTIFICATION USING GAIT RECOGNITION

by

Azfar Khoja (P.R.No.: 201305838)
John George (P.R.No.: 201305821)
Mrinal Shinde(P.R.No.: 201305759)
Neviya Prakash (P.R.No.: 201305942)

A project submitted
in partrial fulfilment of the requirements
for the degree of
Bachelor of Engineering
in
Electronics and Telecommunication Engineering
GOA UNIVERSITY

under the guidance of

Prof. MILIND FERNANDES
Assistant Professor,
Electronics & Telecommunication Department
Goa College of Engineering

CERTIFICATE

This is to certify that the project entitled

"HUMAN IDENTIFICATION USING GAIT RECOGNITION"

submitted by

Azfar Khoja	**P.R. No.: 201305838**
John George	**P.R. No.: 201305821**
Mrinal Shinde	**P.R. No.: 201305759**
Neviya Prakash	**P.R. No.: 201305942**

has been successfully completed in the academic year 2016-2017 as a partial fulfilment of the requirement for the degree of BACHELOR OF ENGINEERING in Electronics and Telecommunication Department, at Goa College of Engineering, Farmagudi.

PROJECT APPROVAL SHEET

The project entitled

"HUMAN IDENTIFICATION USING GAIT RECOGNITION"

by

Azfar Khoja	**P.R. No.: 201305838**
John George	**P.R. No.: 201305821**
Mrinal Shinde	**P.R. No.: 201305759**
Neviya Prakash	**P.R. No.: 201305942**

completed in the year 2016-2017 is approved as a partial fulfilment of the requirements for the degree of **BACHELOR OF ENGINEERING in Electronics and Telecommunication Engineering** and is a record of bonafide work carried out successfully under our guidance.

_____

(Project Guide)
Milind Fernandes
Assistant Professor,
ETC Dept.

_____

(Head of Department)
Dr. H. G. Virani
Professor, ETC Dept.

_____

(Principal)
Dr. V. N. Shet
Goa College of Engineering

Place: Farmagudi, Ponda, Goa

Abstract

In recent years, biometric recognition and authentication has attracted a significant attention due to its potential applicability in social security, surveillance systems, forensics, law enforcement, and access control. A biometric system can be defined as a pattern-recognition system that can recognize individuals based on the characteristics of their physiology or behaviour. One biometric technique for unintrusive identification is gait recognition which basically identifies people by the way they walk. In former work, gait recognition is mainly achieved with camera systems. In this study, we present an approach for gait recognition using Microsoft Kinect V2, a peripheral for the gaming console XBOX One, which provides us with marker less tracking of human motion in real time. We extract and evaluate a number of static and kinematic features and present the results of various classification algorithms for person identification.

Chapter 1

Introduction

1.1 Preamble

1st para of first section

second para

1.2 Motivation

This is how you create bullets:

- First bullet
- second bullet

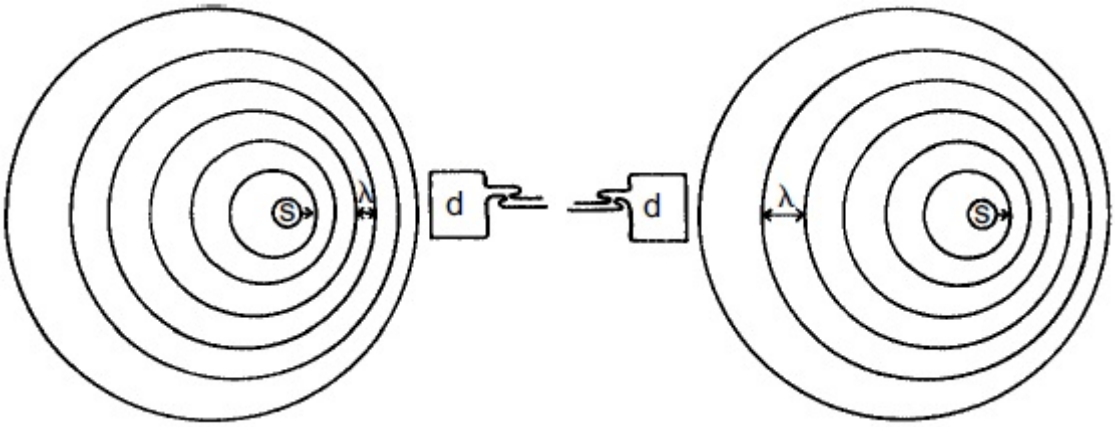
1.3 Objective

same way

1.4 Outline

1.4.1 This is a sub section

Mention some figure like this Fig.1.1. which is saved at the location where this file is saved. This is an example of subfigure. You do not need to number the figure, latex will automatically number it for you! And it will appear automatically in the list of figures too!All you need to do is caption it.



(a) Source moving to stationary detector d (b) Source moving from stationary detector d

Figure 1.1: Principles of Doppler Ultrasound

This is how you write equations and mathematical symbols:

In the Fig.1.1(a), an ultrasound source is moving with velocity v_s toward the detector. After time t following the production of any particular wave front, the distance between the wave

front and the source is $(c - v_s)t$, where c is the velocity of ultrasound in the medium. The wavelength λ of the ultrasound in the direction of motion is shortened to

$$\lambda = \frac{(c - v_s)}{\nu_0} \tag{1.1}$$

1.4.1.1 This is a subsubsection

This is how you enter a single figure.Entering the caption automatically gives the figure its number, and the caption appears in the list of figures

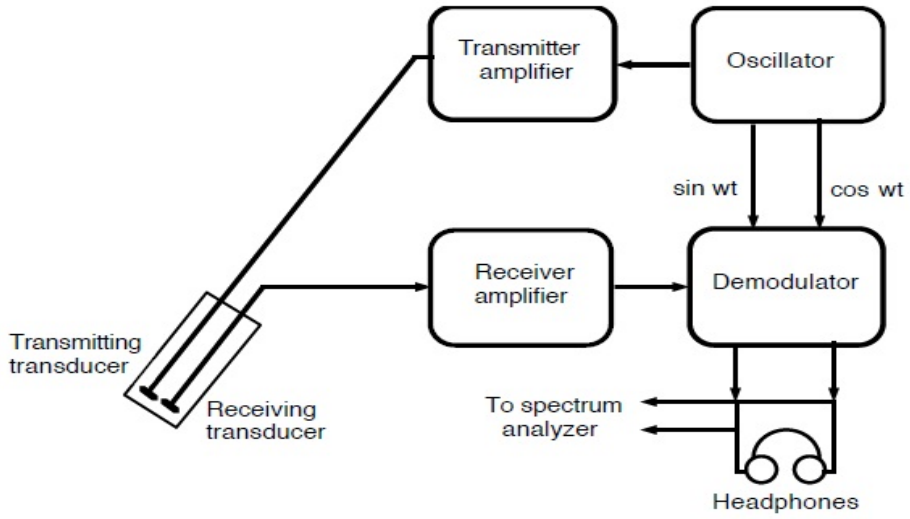


Figure 1.2: The Continuous Wave Doppler system. Signals from the receiving transducers are compared in frequency to those transmitted.

This is an example of a table. You need to write the caption so that it appears here with its table no. as well as in the List of Tables.

column1	column2
1st row 1st column	1st row second column
2nd row 1st column	2nd row 2nd column

Table 1.1: A test table.

Chapter 2

Literature Review

2.1 Introduction

Hey you!! Trying if the header and footer works for the second chapter

2.1.1 This is a sub section

Yes, true, It is indeed a subsection.

will be trying now to continue this chapter to the next page to see if the header and footer appear there on the second page too.

Hey this is supposed to be the next page. See if header and footer are there.

Please feel free to add intermediate sections according to your project requirement.

2.2 Conclusion

Trying if the header and footer works for the second chapter

2.2.1 This is a sub section

Yes, true, It is indeed a subsection.

Chapter 3

Design/Implementation(whichever applicable)

3.1 Problem Statement

This is the first section of the third chapter.

3.1.1 This is a sub section

Yes, true, It is indeed a subsection.

will be trying now to continue this chapter to the next page to see if the header and footer appear there on the second page too.

Please feel free to add intermediate sections according to your project require-

ment. Work done: Block diagram, design(software, hardware), Implementation

Hey this is supposed to be the next page. See if header and footer are there.

Chapter 4

System Analysis

4.1 Observations

This is the first section of the fourth chapter.

4.1.1 This is a sub section

will be trying now to continue this chapter to the next page to see if the header and footer appear there on the second page too.

4.2 Results

This is the second section of the fourth chapter.

4.3 Discussion

This is the third section of the fourth chapter.

Chapter 5

Conclusion

5.1 General Conclusion

This is the first section of the fifth chapter.

5.1.1 This is a sub section

will be trying now to continue this chapter to the next page to see if the header and footer appear there on the second page too.

5.2 Challenges

This is the second section of the fifth chapter.

5.3 Future Work

This is the third section of the fifth chapter.
